

SKY HIGH TRAFFIC SURVEYS

A DIVISION OF SKY HIGH PLC

High Quality Data Collection & Cost Effective Data Hosting

With over 45 years of combined company experience in the fields of traffic data collection and analysis Sky High Traffic Surveys and traffic analysis software specialists Drakewell are pleased to offer clients a complete solution to their data collection and analysis needs. Combining Sky High's fieldwork and project management expertise and Drakewell's powerful C2 database system through Sky High clients can commission traffic and transport surveys, the C2 database system or an integrated service of both.

C2 is a fully maintained professional data hosting system for customers who wish to have cost effective 24/7 access to their traffic data. The system is manufacturer independent, allowing processing and reporting of data from all major temporary and permanent ATC recorder file types and data from other sources such as manual and video surveys.

A front-end map allows users to see the locations of their survey data and gives you direct access to a wide array of reports. C2 can be hosted on a clients own server or via the Sky High/Drakewell web hosting platform providing password protected data access to anyone, anywhere and anytime.

The Sky High C2 package brings you time and cost savings and allows you to get on with simply using the data. You commission the surveys, you view the results we take care of everything in between.

In summary the Sky High C2 service provides:

- Complete Data Collection package including temporary and permanent traffic, cycle and pedestrian counting systems, video, manual and journey time surveys, bluetooth tracking
- Manufacturer Independent Data Hosting
- Integrated Traffic Database for ATC, ANPR, Journey Time, Manual & Turning Counts, Incident Detection, Bluetooth Tracking and much more
- Over 100 reports, Including Volume, Class, Speed, Length, Journey Time O-D, Air Quality and Turning Count
- 24/7 Hosted data service
- Real Time Monitoring and Incident Detection
- Map Based Interface
- Fully Secure Server
- Limitless Nodes, Sites, Data or Users

TESTIMONIALS

"...Sky High have assisted us in the procurement of a new traffic storage database system for the newly formed Central Bedfordshire Council. Through their collaboration with the traffic software company Drakewell, they have been able to offer us an improved service which integrates traffic data collection and storage, which is managed internally by Sky High. This new arrangement will, in due course save us administration time and costs in processing and analysing traffic data."

Colin Wilkinson, Senior Transport Planner, Bedfordshire Highways, Amey.

"The use of C2 software supplied by Sky High will introduce innovative, efficient and effective ways of workings, avoiding duplication of effort by working smarter and providing immediate access to data to deal with member and community concerns."

Andy Barr, Assistant Transportation Manager, Liverpool City Council's Highways Management Department
